Changes

(1) Reason for the decrease:

MIC announced new broadband subscriber counting guideline in July to enable investors to compare the number of broadband subscribers based on the same counting measure.

According to the guideline, all broadband service providers have to count number of lines, instead of number of PCs in service.

The new counting measure has effected the number of KT's Megapass Satellites subscribers to decrease, but subscribers in other broadband services remain the same.

(2) ADSL-My IP, ADSL-Multi IP, Homenet and Officenet subscribers are coombined and represented as ADSL Multi-IP because of the similar service characteristics.

(3) Title change to WLAN from NESPOT

Subscriber breakdown included

(4) Title change to Internet Leased Line from Internet-Retail Lines(Kornet LL)

(5) KTF numbers are excluded, see attached KTF Factsheet

(6) No. of non-refundable subscribers excluded

(7) No. of digital lines excluded
